

WHAT IS EMS?

ELECTRONIC MUSCLE STIMULATION

EMS ELECTRONIC MUSCLE STIMULATION is a technique based on decades of research and development. This method has been used successfully in science and professional sports for decades and is now a very successful form of fitness in all fields. EMS passive movement, through the stimulation of human brain signals to stimulate the muscles of the whole body, to achieve the purpose of training. After 20 minutes of BODYTECH EMS, it is same as 120 minutes of traditional.
